RASHMI KUMARI

+91 9142522986 | rashmikumar42005@gmail.com | LinkedIn | GitHub | Portfolio

OBJECTIVE

Final-year B.Tech Computer Science student specializing in Cyber Security with 6+ internships spanning AI/ML, full-stack development, and cybersecurity. Hands-on experience building NLP classifiers, ML pipelines, deep learning models, and secure network tools. Passionate about applying machine learning to solve real-world problems.

EDUCATION

B.Tech — Computer Science & Engineering (Cyber Security) 2022 – 2026
Government Engineering College West Champaran — Bihar, India CGPA: 8.2 / 10
Relevant Coursework: Network Security, AI-powered Threat Detection, Machine Learning
Final Year Project: LocalBiz: A Location-Based Business Discovery Platform with Integrated Healthcare Services

TECHNICAL SKILLS

Programming Languages	Python, C++, JavaScript, SQL, Bash
ML / AI Frameworks	Scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib, Seaborn
ML Techniques	Supervised/Unsupervised Learning, NLP, Deep Learning, Feature Engineering
Web & Cloud	React.js, MongoDB, REST APIs, Node.js, Salesforce (Apex, Lightning)
Tools & Platforms	Jupyter Notebook, Git, GitHub, Linux, VS Code

EXPERIENCE

AI/ML Intern | *Invigo Pvt. Limited* June 2025 - July 2025

- Built end-to-end ML pipelines (pre-processing, feature extraction, evaluation) using Python and Scikit-learn.
- Implemented supervised and unsupervised learning algorithms for production-level NLP tasks.
- Applied feature engineering techniques to real-world datasets, improving overall model generalization.

Web Development Intern | *BSPGCL (Bihar State Power Gen. Co. Ltd.)* Dec 2025 - Jan 2026

- Architected a full-stack MERN application with RESTful APIs to digitise manual utility workflows.
- Practised agile workflows, strict MVC architecture, code reviews, and disciplined Git version control.

Salesforce Developer Virtual Intern | *Salesforce* 2024 (8 Weeks)

- Configured CRM customisation, workflow automation, and security on the Salesforce Lightning platform.
- Developed Apex code and configured platform features for enterprise-grade software development.

AI/ML Intern | *Kodacy* 2024 (30 Days)

- Executed data pipeline creation and model training workflows during an intensive AI/ML programme.

PROJECTS

Fake News Detector: Developed an NLP misinformation classifier achieving 85% accuracy using TF-IDF vectori- sation and a Passive-Aggressive Classifier trained on labelled datasets. (GitHub)

Async Port Scanner: Built a high-performance C++20/Boost.Asio TCP scanner sending hundreds of concurrent connection probes with service mapping (HTTP, SSH, FTP) and banner grabbing. (GitHub)

CERTIFICATIONS & TRAINING

- **Cybersecurity Virtual Simulation** (IAM & Security Practices) — *Tata Group (Forage)*
- **Salesforce Developer Virtual Internship** — *Salesforce* (8 weeks)
- **AI & Machine Learning Internship** — *Kodacy* (30 days) & *InternCertify* (15 days)
- **Web Development Internship Certificate** — *BSPGCL under DSTTEE | Dec 2025 – Jan 2026*
- **Python Essential 1 & 2** — Cisco Networking Academy program.
- **CCNA** (Enterprise Networking, Security, and Automation)— Cisco Networking Academy program.
