

Rashmi Kumari

Software Developer | AI/ML Engineer | Python | Java | Data Structures & Algorithms
rashmikumari042005@gmail.com | +91-9142522986 | [linkedin](#) | [Github](#) | [Portfolio](#)

CAREER OBJECTIVE

Aspiring AI/ML Engineer with hands-on experience building end-to-end machine learning pipelines and NLP applications. Proficient in Python, TensorFlow, Scikit-learn, and feature engineering with demonstrated 85-89% accuracy on real-world classification tasks. Seeking to apply strong foundation in supervised learning, deep learning, and data preprocessing to develop innovative AI solutions that solve complex business problems while continuously advancing expertise in modern ML frameworks and MLOps practices.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, SQL, Bash

DSA & OOP: Arrays, Linked Lists, Trees, Graphs, Sorting, Dynamic Programming, Object-Oriented Programming

AI / ML: Scikit-learn, TensorFlow, NumPy, Pandas, NLP, TF-IDF, Deep Learning, Feature Engineering

Web & Tools: React.js, Node.js, Express.js, REST APIs, MongoDB, Git, GitHub, Linux, Agile/Scrum, Salesforce

INTERNSHIP EXPERIENCE

AI/ML Intern | Invigo Pvt. Limited

Jun 2025 – Jul 2025

- Built end-to-end ML pipelines (preprocessing, feature engineering, model training, evaluation) using Python and Scikit-learn; delivered NLP text classification tasks using TF-IDF in an agile sprint workflow.
- Implemented supervised and unsupervised learning algorithms on real-world datasets; improved model accuracy through iterative feature engineering and hyperparameter tuning.

Web Development Intern | BSPGCL – Bihar State Power Generation Co. Ltd.

Dec 2025 – Jan 2026

- Architected a full-stack MERN application (React.js + Node.js/Express.js + MongoDB) using MVC architecture and RESTful APIs to digitize government workflows for millions of users.
- Followed agile development practices: sprint planning, peer code reviews, and disciplined version control via Git and GitHub throughout the project lifecycle.

Salesforce Developer Intern | Salesforce (Virtual)

2024 – 8 Weeks

- Built Salesforce CRM applications using Apex (object-oriented programming), Lightning components, and workflow automation — demonstrating enterprise-level software development skills.

PROJECTS

Employee Attrition Prediction System | Python | Scikit-learn | Flask | React.js | REST API

- Full-stack AI app predicting employee attrition risk using Gradient Boosting (85% accuracy) on IBM HR dataset; Flask REST API serves predictions to a React.js dashboard with SHAP-based explainability reports.

Fake News Detection System | Python | NLP | TF-IDF | Scikit-learn

- NLP classifier achieving 85% accuracy using TF-IDF vectorization and Passive-Aggressive Classifier on labeled news corpus; demonstrates end-to-end text preprocessing and supervised learning pipeline.

Async Network Port Scanner | C++20 | Boost.Asio | CMake | TCP/IP

- High-performance asynchronous TCP scanner with concurrent probes, service mapping (HTTP, SSH, FTP), and banner grabbing — built using object-oriented C++20 and Boost.Asio for network security auditing.

EDUCATION

B.Tech – Computer Science Engineering (Cybersecurity Specialization)

Government Engineering College, West Champaran, Bihar | **CGPA: 8.2 / 10**

Key Subjects: Data Structures & Algorithms, Object-Oriented Programming, Network Security, Database Management, Operating Systems, AI & Machine Learning

CERTIFICATIONS

- Cybersecurity Virtual Simulation – IAM & Security Practices | Tata Group (Forage)
- Salesforce Developer Virtual Internship Certification | Salesforce | 8 Weeks
- Machine Learning Internship Certificate | InternCertify | 15 Days
- Graduation Year: 2026 | Branch: CSE (Cybersecurity) |
