Full Stack Developer • React.js • Node.js • TypeScript • MERN Stack • Available to Join Immediately
Immediate Joiner • Open to Full-Time & Remote Roles

Summary

Recent B.Tech (CSE, Cybersecurity) graduate from GEC West Champaran with hands-on experience building production-grade full-stack web applications using the MERN stack and TypeScript. Interned at a government power utility and completed a Salesforce virtual internship, gaining exposure to both public-sector workflows and enterprise CRM development. Strong foundation in REST API design, relational and NoSQL databases, authentication systems, and agile delivery practices. Actively seeking a full-stack or frontend developer role to contribute to real-world products.

Experience

BSPGCL–Bihar State Power Generation Co. Ltd.

Patna, Bihar

Web Development Intern | [Github](#)

Dec 2025- Jan 2026

- Architected a full-stack MERN application integrating MongoDB with RESTful APIs, enforcing data integrity and schema design for government-scale digital workflows
- Wrote efficient database queries and maintained clean data contracts between backend services and the React.js frontend, ensuring accurate data flow across all modules.
- Applied agile practices including sprint planning, peer code reviews, and version control via Git/GitHub to collaboratively deliver production-grade features on schedule.

Salesforce (Virtual Internship)

Remote

Salesforce Developer Intern

8 Weeks

- Developed Salesforce CRM applications using Apex (OOP), Lightning Web Components, and declarative workflow automation tools.
- Gained enterprise-level experience with structured data management, business process automation, and role-based access within the Salesforce platform.

Projects

LocalBiz– Location-Based Business Discovery Platform | [React](#), [TypeScript](#), [Node.js](#), [SQLite](#) | [Github](#) , [Live](#)

- Engineered a full-stack, location-based e-commerce platform with end-to-end workflows: dynamic product routing, persistent shopping carts, checkout processing, and historical order tracking.
- Built a responsive SPA with Vite, Tailwind CSS, and Radix UI; used React Query and custom Context APIs for optimized state management of user sessions and storefront data.
- Designed a robust REST API with SQLite + Drizzle ORM; implemented JWT/bcryptjs authentication, Role-Based Access Control (RBAC) for admin dashboards, and Nodemailer email workflows.

AniVault– Anime Movie Discovery and Download Hub | [HTML5](#), [CSS3](#), [VanillaJS\(ES2020+\)](#), [JikanAPIv4](#), [REST-APIs](#) | [github](#) , [live](#)

- Engineered a fully static, zero-backend anime discovery platform consuming the Jikan API v4 (MyAnimeList wrapper) with intelligent request throttling (400–600ms staggered delays) to respect 3 req/s rate limits, loading 5+ concurrent content sections without hitting API limits.
- Developed a custom hero slider with auto-rotation, dot navigation, and smooth CSS transitions pulling live poster art and metadata from the API, replacing all static template content with dynamic data while preserving a fully responsive mobile-first layout.
- Built a real-time global search engine with pagination querying the entire MyAnimeList database (900K+ titles), alongside genre filtering, multi-criteria sorting (popularity, score, title, rank), and skeleton shimmer loading states for a production-grade UX

Skills & Competencies

Frontend: React.js, Tailwind CSS, HTML5, CSS3, Vite, Radix UI, SPA Architecture, Responsive UI Design

Backend: Node.js, Express.js, REST API Design, JWT Authentication, RBAC, API Integration, Nodemailer

Databases: MongoDB, SQLite, Oracle PL/SQL, Drizzle ORM, SQL (DDL/DML/DQL), Schema Design, Data Modelling

Security: AES Encryption, bcryptjs, HTTPS, Input Validation, Cybersecurity Fundamentals, Network Security

Tools & Workflow: Git, GitHub, Linux, Agile/Scrum, Postman, VS Code, Code Reviews, Version Control CRM/

Platform: Salesforce, Apex, Lightning Web Components, Workflow Automation

Education

Government Engineering College, West Champaran

Bettiah , Bihar

B.Tech in Computer Science Engineering (Cybersecurity Specialization)

10/2022 - 05/2026

- Relevant Coursework: Data Structures and Algorithms (C++), DBMS, Operating System, TOC & CD, Discrete Mathematics, Cybersecurity / Network Security, OOPs, Software Engineering

Certifications

- WebDevelopment | IIT Roorkee (Ihub Divya Sampark)
- Data Science | NPTEL Swayam
- IOT | NPTEL Swayam

Availability: **Immediate** | **Open to Full-Time, Contract & Remote roles**
